DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see p.7-10, filed 12/06/10, with respect to 102(b) and 103(a) rejection have been fully considered and are persuasive. The rejection of the claims has been withdrawn.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "*adding noise ... at least one other pixel in the picture*" must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as

Art Unit: 2611

either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claim 11 is rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Regarding claim 11, the claim recites "adding noise ... at least one other pixel in the picture". The specification describes wherein the "adding noise ... at least one prior picture". However, the specification does not describe in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention of "adding noise ... at least one other pixel in the picture".

The following is a quotation of the second paragraph of 35 U.S.C. 112:

Art Unit: 2611

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-32 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claim 1, lines 4-5, the claim recites "... following decoding ...", while line 3 recites "decoding ...". Based on the recitation it is unclear whether the decoding in line 5 is related to the decoding in line 3, or not. It appears that it is. However, based on the recitation, it is unclear whether "decoding" in line 5 is a different decoding from the "decoding" in line 3, or not. Therefore, the claim fails to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 7, 11, 12, 20, 27 and 32 are rejected as applied to claim 1. Claims 2-6,8-10,13-19,21-26 and 28-31 depend on one of the claim above.
